Prices as of 24 November 2026

Cloud, DevOps, security and AI infrastructure services from Amman, Jordan.

Cloud Infrastructure Assessment

Consulting & Assessments

Identify infrastructure risks, inefficiencies and opportunities.

- Find your biggest risks before they cause an incident
- See which spending you can cut or redirect
- Get a prioritized list your team can start on straight away

Engagement	Estimated duration	Price
One-time assessment	Typically 2 to 3 weeks	From 750 JOD

Cloud Cost Optimization

Cloud

Reduce unnecessary cloud expenditure and improve resource utilization.

- Lower monthly cloud spend without weakening reliability
- Costs broken down by team, product or environment
- Budgets and alerts that keep spending in check afterwards

Engagement	Estimated duration	Price
Fixed-scope project	Typically 3 to 6 weeks	From 1,500 JOD

DevOps & CI/CD Implementation

DevOps & Platforms

Automate software delivery and improve deployment reliability.

- Releases that take minutes instead of a day of manual steps
- Fewer failed deployments and quicker rollback
- One delivery process for every team and environment

Engagement	Estimated duration	Price
Implementation project	Typically 4 to 8 weeks	From 2,500 JOD

Kubernetes & Platform Engineering

DevOps & Platforms

Build, modernize and optimize container platforms.

- A platform developers can deploy to without raising tickets
- Clusters you can upgrade and rebuild from code
- Better use of the compute you already pay for

Engagement	Estimated duration	Price
Project-based	Typically 6 to 12 weeks for a new platform	Request a quote

Cybersecurity & DevSecOps

Security

Secure your infrastructure and software delivery lifecycle.

- Fewer ways in for attackers
- Security checks on every change, inside the tools developers already use
- Evidence you can show auditors and enterprise customers

Engagement	Estimated duration	Price
Project-based	Typically 3 to 8 weeks	Request a quote

Managed DevOps Services

Managed & Outsourcing

Your external cloud and infrastructure engineering partner.

- Maintenance that does not depend on your product team's spare time
- Problems caught by monitoring before customers report them
- A monthly report on what changed and what needs attention

Engagement	Estimated duration	Price
Recurring service	Ongoing	From 1,500 JOD/month

Dedicated Engineering & IT Outsourcing

Managed & Outsourcing

Cloud, DevOps and security engineers who work as part of your team.

- Add skills without a long hiring process
- Grow or shrink the team as projects change
- Engineers who follow your tools and processes

Engagement	Estimated duration	Price
Dedicated engineers, monthly	Agreed per engagement	Request a quote

AI Infrastructure & Automation

AI

Infrastructure to run AI applications in production, and automation of repetitive business processes.

- AI projects that get from demo to production
- Sensitive data kept inside your own environment when required
- Hours saved on repetitive manual work

Engagement	Estimated duration	Price
Project-based	Typically 4 to 10 weeks	Request a quote

Disaster Recovery & Business Continuity

Cloud

Make sure critical systems can be restored, and prove it with regular tests.

- Known recovery times for each critical system
- Backups that have actually been restored in a test
- A recovery plan people can follow under pressure

Engagement	Estimated duration	Price
Project-based	Typically 4 to 8 weeks	Request a quote

Cloud Architecture & Technical Consulting

Consulting & Assessments

Independent architecture advice for decisions about cloud, platforms and technology direction.

- Decisions backed by an independent technical review
- Lower risk on large technology investments
- A roadmap your team can actually carry out

Engagement	Estimated duration	Price
Advisory engagement	Typically 1 to 4 weeks	Request a quote

Managed DevOps packages

Essential

Regular health checks, monitoring and a monthly report, with engineering time set aside for you.

From 1,500 JOD/month

- Infrastructure health reviews
- Monitoring support
- Monthly reporting
- Allocated engineering capacity

Professional

Adds hands-on work on your pipelines, Kubernetes clusters, cloud costs and maintenance.

From 2,500 JOD/month

- Everything in Essential
- CI/CD automation
- Kubernetes support
- Cloud cost optimization
- Infrastructure maintenance

Enterprise

Engineering capacity, security work and service levels shaped around your operations.

From 4,000 JOD/month

- Everything in Professional
- Customized engineering capacity
- Architecture consulting
- Security engineering
- Customized service-level agreement
